

XCR³ CORK RUBBER FLOORING *COMMERCIAL SUITABILITY*

TECHNICAL SUPPORT 800.345.6202

Made from a unique blend of recycled and post production cork and rubber, XCR³ offers a natural, environmentally safe, high performance flooring product. XCR³ is flexible, durable, quiet and very comfortable under foot. With all of the benefits of cork and rubber combined, it performs incredibly well under the harshest commercial situations. Based on a 40 year old transportation grade flooring material, XCR³ is suitable for heavy commercial applications including retail, corporate, education, and institutional, as well as sports and healthcare facilities. XCR³ can be maintained using standard maintenance methods typical of other resilient flooring materials.

The key to the durability of XCR³ is its' unique mixture of cork and rubber that is combined and vulcanized under high temperature and pressure. The resulting product is flexible enough to cove, yet extremely resistant to scratching, scuffing and tearing. Additionally, only light stable pigments are used to limit the possibility of fading. Because cork and rubber are resilient, XCR³ is resistant to excessive wear caused by foot traffic, as the material has the ability to "give" before damage occurs.

Regular maintenance of XCR³ includes daily sweeping and damp mopping. We recommend applying a sealer to XCR³ to further protect and enhance the floor. When wear of the site-applied sealer becomes evident, application of an additional coat is recommended. It can be quickly applied and ready for traffic within hours. As with any flooring surface, regular maintenance will greatly increase the life and preserve the beauty of the floor. Complete ***XCR³ Care and Maintenance Instructions (Document ID: 211)***, are available and should be followed.

XCR³ is unmatched by any other flooring product available on the market today. It's high level of durability; natural texture and functional benefits provide an attractive surface that can be used in a wide range of areas. XCR³ will provide years of problem free service. XCR³ is warranted for one year against manufacturing defects and ten years against complete wear through. ***XCR³ Warranty (Document ID: 234)*** is available on our website or from your local sales agent.
